Subject: 038443: South Dayton Dump & Landfill - Figure Showing Different Areas of the Site
38443-15(MEMO025)GN-WA021-figure -.pdf

Hi Leslie

During our last meeting in Chicago, you had asked that we provide a figure showing the different areas of the site, i.e., licensed landfill areas, areas with no waste, etc..

I've attached a figure that shows the various areas based on the available information

We divided it up into the following separate classifications:

- Areas where no waste has been disposed (based on available data) - in the south, there are data gaps.
- Areas where waste was disposed of independently of the operation of the South Dayton Dump (pre-1969 and any regulatory requirements)
- Areas where waste was disposed of independently of the operation of the South Dayton Landfill (post-1969 and following the original licensure)
- Areas where filling occurred during the period of licensure that are believed to have been part of the landfill

Let me know if this is in line with what you were looking for.

See you tomorrow at 9:00 a.m. CT.

Thanks, Adam
